DETAILED ACTION

I. Rejection of claims 1-4,7,11-13,15 under 35 USC 103(a) will not be will be maintained under 35 USC 103(a) as being obvious over JP '229. Applicant has amended claims to include objected to subject matter.

II. Applicant's arguments, filed 4/16/04, with respect to the rejection(s) of claim(s) under 35 USC 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of below arguments.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4,6-13,15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11-20 of copending Application No. 09/940,778. Although the conflicting claims are not identical, they are not patentably distinct from each other because Hsu teaches an aqueous detergent composition comprising 0.01-20% capsules comprising instant 0.1-15%

Application/Control Number: 09/940,933

Art Unit: 1616

triblock copolymer and hydrocarbon oil. Hsu teaches that the composition comprises bleach, a benefit agent, and colorant and that the composition can be contained in a transparent package. See claims. Hsu does not claim his detergent comprising a surfactant or hydrophobic solid. However, Hsu does state in the body of the specification that the detergent composition can comprise a surfactant and a hydrophobic solid. See paragraphs 55,97-99,124. Hsu also claims an aqueous personal care composition comprising 0.1 to 20% capsule, 0.1 to 15% block copolymer, hydrocarbon oil, and cosmetically acceptable carrier. Hsu claims that the composition is transparent. See claims. Hsu does not claim that the personal care composition comprises a benefit agent. However, in the body of the specification, Hsu does teach the inclusion of a benefit agent in the personal care composition. See paragraph 109. It would have been obvious to one having ordinary skill in the art to add the surfactant, and hydrophobic solid to the instant detergent composition and for one having ordinary skill in the art to add a benefit agent to the instant personal care composition. One would have been motivated to do this since Hsu suggests these additions in the body of his specification.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Telephonic Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton N. Pryor whose telephone number is 571-272-0621. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m..

Application/Control Number: 09/940,933

Art Unit: 1616
